CURRENT POSITION

UNIVERSITY OF PENNSYLVANIA

Philadelphia, PA

Managing Director, Computational Social Science Lab and Center for AI and Society

July 2022 – Present

Lecturer, Data Science and Statistics with the Wharton School

Serve as the Managing Director of the Computational Social Science Lab, a joint initiative between the School of Engineering and Applied Sciences, the Wharton School of Business, and the Annenberg School of Communications, overseeing the research and administrative team, large-scale lab operations, and positioning in the larger university and research space. Member of the leadership team for the Center for AI and Society, contributing to the strategic development and interdisciplinary collaborations across analytics, artificial intelligence, and their societal implications. Lead efforts to develop and secure funding for innovative, cutting-edge computational social science research and programs that advance the Lab's mission to address both societal and fundamental challenges and enhance the Lab's research output to strengthen its impact on public discourse and policy, ensuring that the Lab remains at the forefront of computational social science, both within Penn and beyond.

- **Leadership** - Direct the Lab's administrative and operational activities, managing budgets, staffing, and resource allocation to support ongoing and future research projects. Lead strategic development, infrastructure enhancement, and outreach for the Computational Social Science Lab to position the Lab as a leader in computational social science.
- **Research** - Design and conduct data science experiments with analysis of digital experiments involving digital analytics, network data, sampling, modeling and inference with social network data, confirmatory and causal analysis in complex observational studies with a time, space, and/or network component focusing on solving large-scale societal problems.
- **Fundraising** - Co-led the establishment of the Penn Center on Media, Technology, and Democracy and played a critical role in the \$10 million Knight foundation grant award, working closely with the Principal Investigators, Christopher Yoo and Duncan Watts, to develop the grant proposal, vision and infrastructure as well as manage relationships with the six participating schools at Penn, develop a very complex budget and key relationships with the communications, finance, research, development and alumni relations, human resources, six Deans, and the President's office teams to ensure cohesive efforts and adherence to the grant's timeline. Additionally, played a key role in securing a \$998,028 NSF grant, a \$524,963 Templeton World Foundation grant, and a \$1.2 million gift from a Wharton alumnus, significantly contributing to the Lab's financial sustainability and research capabilities.
- **Partnership and Stakeholder Development** - Establish and maintain relationships with key stakeholders, including faculty, researchers, and external partners, to promote the Lab's goals and secure additional funding and resources. Develop cross-school collaborations within Penn, leveraging expertise and creating partnerships with School of Engineering and Applied Sciences, the Wharton School of Business, and the Annenberg School of Communications, and

other schools to advance the lab's objectives. Additionally, engage with industry partners, policy makers, and the broader community to disseminate the lab's research and findings to enhance its impact on public discourse and highlighting the Lab's contributions to addressing societal challenges through computational social science.

- **AI and Society Impact** - Lead the development of AI initiatives, including the organization of a landmark regional workshop, AI for Disaster Relief cohosted by Penn, Meta's AI for Good and Crisis Ready, to connect government agencies, researchers, nonprofits, and industry at Penn to responsibly translate cutting-edge AI research into tools that help keep people safe, particularly with the upcoming hosting of FIFA World Cup and America 250.

INTERNATIONAL SOCIETY FOR COMPUTATIONAL SOCIAL SCIENCE

Philadelphia, PA

Executive Director

July 2022 - Present

Play a pivotal role in driving the mission of the International Society for Computational Social Science (ISCSS), overseeing the operations and organizational structure of the Society and the International Conference on Computational Social Science (IC2S2), which is a flagship event in the field of computational social science. Additionally, coordinated with international collaborators, academic institutions, and industry partners to ensure the conference's success, impact, and reach as well as position ISCSCS as a leader in the global computational social science community. Work with the IC2S2 board in an advisory role to aid in the governance of the society and conference, playing a pivotal role in shaping the conference's development and ensuring its success to support the growth and strategic direction of ISCSCS.

- **Strategy** - Provide strategic oversight and direction for the ISCSCS, ensuring alignment with its mission to advance the study of computational social science through interdisciplinary research and collaboration. Lead the development and execution of the Institute's academic and public outreach programs, including conferences, workshops, and collaborative research initiatives that enhance its visibility and impact.
- **Leadership** - Direct the Institute's administrative and operational activities, managing budgets, staffing, and resource allocation to support ongoing and future research projects. Ensure that ISCSCS remains at the forefront of computational social science research by fostering a dynamic, innovative environment that encourages the exploration of new research questions and methodologies.
- **Partnership and Stakeholder Development** - Establish and maintain relationships with key stakeholders, including faculty, researchers, and external partners, to promote the Institute's goals and secure additional funding and resources.

TEMPLE UNIVERSITY

Philadelphia, PA

Executive Director, Data Science Institute

September 2020 - July 2022

Assistant Professor of Research, Statistical Science

Managing Director, Pedagogical Research

Serve as the Executive Director of the university-wide Data Science Institute, developing cutting-edge data science research and programs with the private and

public sectors to advance research in a variety of fields through meaningful collaborations that address societal and fundamental problems through deep expertise and next generational tools and techniques. Faculty member and researcher in Statistical Science and Data Science with a focus on networks and information systems.

- **Research** - Design and conduct analysis of digital experiments involving digital analytics, network data, sampling, modeling and inference with social network data, confirmatory and causal analysis in complex observational studies with a time, space, and/or network component in financial technology (FinTech), crowdfunding, and emerging technologies. Projects include a stochastic volatility study of cryptocurrency trading, structural text modeling of tax-related Twitter data, an eviction network study in conjunction with the City of Philadelphia, an observational network study with the mobile application startup, Truckbux.
- **Data Science Institute Development** - Oversee the advancement of the Institute, its Advisory Board and governance, including the development of partnerships with public and private organizations, including Disney, Wells Fargo, Google, LongTail Alpha, Blackrock, Millennium Management, the Cortlandt Group, the Keystone Space Collaborative, Blockchain.com, the City of Philadelphia, among others, to develop meaningful collaborations to address organizational and societal challenges using data science techniques. Spearhead budgeting, faculty and research engagement, and the development of a Women in Data Science Collective at Temple. Develop and oversee National Science Foundation, National Institute of Health, Office of Naval Research, DARPA, and NASA grant projects. Direct marketing efforts, digital media, conferences, and events.
- **Teaching and Service** - Teach Statistical Learning and Data Mining, and Social Network Analysis, Quantitative Methods, and Information Economics courses for the doctoral student population. Serve as the lead for pedagogical research for the Fox School of Business. Serve as an Evaluator for the Young Scholars Interdisciplinary Forum and grant-writing lead.

HARVARD UNIVERSITY AND TEMPLE UNIVERSITY
Philadelphia, PA

Cambridge, MA and

Postdoctoral Research Fellow

2019 - 2020

Researcher in data science and digital analytics with a focus on networks, information systems, and statistics under the supervision of Edoardo Airoldi, Ph.D., the Mildred Gladfelter Professor of Statistics and Data Science at Temple University and Faculty, The Broad Institute of Harvard and MIT.

- **Research** - Design and conduct analysis of digital experiments involving business analytics, network data, sampling, modeling and inference with social network data, confirmatory and causal analyses in complex observational studies with a time, space, and/or network component in financial technology (FinTech), crowdfunding, and emerging technologies. Projects include a network study of tax law development with Vertex, an eviction study in conjunction with the City of Philadelphia, an observational network study with the mobile application startup, Truckbux, and the development and management of National Science Foundation, National Institute of Health, and Office of Naval Research grant projects.
- **Data Science Institute Development** - Oversee the advancement of the Data Science Institute's Advisory Board and governance, including the development of

partnerships with Disney and Wells Fargo. Lead marketing efforts with a web campaign, strategic partnerships, digital media, events, and viral marketing.

- **Teaching and Service** - Teach the Social Network Analysis and Information Economics courses for the doctoral student population. Serve as an Evaluator for the Young Scholars Interdisciplinary Forum.

HARVARD UNIVERSITY AND TEMPLE UNIVERSITY Cambridge, MA and Philadelphia, PA

Research Fellow 2018 - 2019

Researcher in data science and digital analytics with a focus on networks, information systems, and statistics under the joint supervision of Paul Pavlou, Ph.D., the former Senior Associate Dean for Faculty, Research, Doctoral Programs, and Strategic Initiatives at the Fox School of Business, the Milton F. Stauffer Professor of IT & Strategy, and Edoardo Airoidi, Ph.D., the Mildred Gladfelter Professor of Statistics and Data Science at Temple University Associate Faculty, The Broad Institute of Harvard and MIT.

- **Research** - Design and conduct analysis of digital experiments involving business analytics, network data, sampling, modeling and inference with social network data, confirmatory and causal analyses in complex observational studies with a time, space, and/or network component in financial technology (FinTech), crowdfunding, and emerging technologies.
- **Data Science Institute Development** - Oversee the advancement of the Data Science Institute's Advisory Board and governance, including the development of its Bylaws. Lead marketing efforts with a web campaign, strategic partnerships, digital media, events, and viral marketing.
- **Teaching and Service** - Designed, developed, and teach the Social Network Analysis course, Information Economics, and Management and Organizational Theory courses for the doctoral student population. Serve as an Evaluator for the Young Scholars Interdisciplinary Forum. Teaching experience includes traditional, executive and on-line delivery modes.

EXPERTISE

Machine Learning/DNN	Social Network Analysis (probabilistic and causal analysis)
Causal Inference	Python, R, SQL, Hadoop and Spark programming
Quantitative methods for High Frequency Trading (microstructure, dlm, trading strategies)	Sentiment Analysis/NLP/CNN/Javascript/D3/PHP/CSS Relationship Development

EDUCATION

Drexel University, 2005-12	Doctor of Philosophy, Educational Leadership & Learning Technologies
Columbia University, 1999-2001	Master of Arts, Curriculum and Teaching
Villanova University, 1992-1996	Bachelor of Arts, Philosophy

PRESENTATIONS

- Karr, A.F., Porter, A.A., Ruane, R. *Effects of Training Data Quality on Classifier Behavior for Short DNA Reads*. Object-Oriented Data Analysis and its Applications Conference, Chapel Hill, NC (May 18-20, 2025).
- Karr, A.F., Porter, A.A., Ruane, R. *Effects of Training Data Quality on Classifier Behavior*. 2024 Keystone State Statistical Symposium, Pittsburgh, PA (October 26-27, 2024).
- Ruane, R., Spohrer, J., Rezapohr, S., & Pluta, A. Data Science is the New Literacy. Women in Data Science, Roundtable discussion at the Philadelphia portion of the Stanford University worldwide WiDS conference (April 4, 2022).
- P. Pavlou, E. Airoidi, S. Kumar, A. Aaltonen, R. Ruane, & Y. Vorotyntseva. The Impact of Consumer Overreliance on Online Ratings on Repeat Sales. Paper presented at 2021 POMS Annual Conference (April 30 to May 5, 2021).
- Ruane, R. Effects of New Media on Eviction. Paper presented at the Workshop on the Frontiers in Data Science at Keio University in Tokyo, Japan (January 2020).
- Ruane, R., Chiou, R., Tseng, B., & Mayne-DeLuca, S. Analysis of Online Collaboration among Undergraduate Engineering Technology Students in Green Energy Manufacturing. Paper presented at the American Society for Engineering Education annual meeting in Columbus, OH (June 2017).
- Ruane, R. Network Analysis of an Online Setting Specially Crafted for Cross-Level Peer Mentoring among Online Undergraduate Education Students. Paper presented at the American Educational Research Association annual meeting in Chicago, IL (April 2015).
- Ruane, R. Creating an Online Community to engage and support undergraduate engineering students in Green Energy Manufacturing. Paper presented at the Society for Information Technology and Teacher Education annual meeting in Las Vegas, NV (March 2015).
- Ruane, R. Online peer mentoring: analysis of discussion board interaction among undergraduate preservice education students. Paper presented at the Society for Information Technology and Teacher Education annual meeting in Jacksonville, FL (March 2014).
- Ruane, R. A Qualitative Study of Discussion Board Interaction in an Online Setting Designed for Peer Mentoring. Paper presented at the American Educational Research Association annual meeting in San Francisco, CA (April 2013).
- Ruane, R. & Scales, E. Forging Online Communities: How Many Postings Will It Take? Roundtable discussion paper presented at the 6.0 e-Learning Conference in Philadelphia, PA (March 2008).
- Ruane, R. An Economic Paradigm for Global Teaching. Roundtable discussion paper presented at the World Universities Forum annual meeting in Davos, Switzerland (February 2008).
- Ruane, R. & Grdina, M.J. Re-Visioning Undergraduate Teacher Education: A Model for Curriculum Reform. Paper presented at the Lilly Conference on College and University Teaching in Oxford, OH (November 2006).

CONSULTING

THE CORTLANDT GROUP New York, NY
Consultant 2021 - present
Lead strategic research initiatives focused on network analysis, specifically examining the structural dynamics of human and social capital within a highly selective and curated network of peers. Develop analytical frameworks and

methodologies to map professional interactions, identify key influencers and connectors, and understand network effects spanning multiple organizations and diverse professions. Provide actionable insights and strategic guidance to enhance peer connectivity, collaboration efficiency, and organizational influence within complex professional ecosystems.

EUCLIDEAN LABS, INC

San Francisco, CA

Consultant

2021 - 2023

- Designed and executed comprehensive research strategies using network analysis, focused on analyzing the network structure within an online dating application. Specifically, investigate patterns of user connectivity, cluster formation, and community dynamics. Developed and implemented sophisticated recommender systems leveraging network analytics to enhance user engagement and interaction quality. Additionally, conducted sentiment analysis on user feedback and experiential data to assess user satisfaction, identifying areas for improvement, and optimizing the overall user experience through actionable insights and evidence-based recommendations.

JEFFERSON UNIVERSITY - School of Business

Philadelphia, PA

Consultant

2018 - 2020

- **Strategic Leadership** - Provided strategy and curriculum development for the Applied Business Core curriculum and served on the Business Analytics Steering Committee.

DREXEL UNIVERSITY - College of Engineering

Philadelphia, PA

Program Evaluator and Consultant - Fusing Green Energy into Engineering Education

2013 - 2019

- **Strategic Leadership** - Provide strategy for this United States Department of Education-funded grant project to promote student engagement, interaction, technical success, and leadership excellence among Hispanic engineering students.
- **Design-based Research** - Lead the design of computer-supported collaborative learning environments to allow for meaning-making, knowledge sharing, and sociocultural learning among engineering students. Conduct social network analysis to understand and analyze communication and interaction patterns and their impact on learning and future design.
- **Program Evaluation and Analysis** - Provide formative and summative evaluation services to the project consistent with its program design, evaluation plan, and federal regulations.

DREXEL UNIVERSITY - School of Education

Philadelphia, PA

Consultant - Tech Prep Consortium

2002 - 2003

- **Educational Leadership** - Provided academic support for students with new models of instruction to meet current industry needs and obtain employment in technical careers.

PROFESSIONAL EXPERIENCE

DREXEL UNIVERSITY

Philadelphia, PA

Program Director, Exploratory Studies

2014 - 2017

Founding stage to program completion. Grew revenue by \$10 million and achieved 300% enrollment growth within the first three years of offering. Developed program structure and operations to expand into the international market. Built and managed 10-person team.

- **Innovative Program Development** - Developed an innovative program focusing on expanding the intellectual horizons of students, fostering engagement, accelerating discovery and amplifying strengths of students. Designed and implemented a student-focused advising system to align courses of study with assessed student learning outcomes and academic strengths. Developed a peer mentoring program to aid in freshmen acclimation and engagement through interaction with upperclassmen. Built team of 10 consisting of faculty, research, advising, operations, marketing, and academic support.
- **Strategic Assessment and Relationship Management** - Conducted critical program assessments with regard to teaching and learning, technology and program enhancements, and curricular offerings, aligning educational offerings with strategic goals. Built and managed relationships at the senior level with internal and external constituents focusing on best practices, advocacy, teaching excellence, and program advancement.
- **Leadership** - Strategic leader who shares vision and big picture to optimize results and overcome barriers in new program or policy development through creative problem solving. Promotes a collegial environment with open dialogue, welcoming and encouraging new ideas. Defines and adapts roles, goals, and metrics to center around the customer and student experience, addressing changes, and achieving highest results.

DREXEL UNIVERSITY

Philadelphia, PA

Academic Services Manager

2008 – 2014

Developed strategic communications and innovative solutions to deliver transformative educational experiences for undergraduate and graduate students. Led team of 10 academic, marketing, and program managers.

- **Leadership and Relationship Management** - Built and managed relationships among senior-level leaders centered on student retention, curriculum development, program evaluation and success. Led research and market studies in the development of a prior learning assessment policy expanding the College's offerings.
- **Technological and Curriculum Leadership** - Led team that designed mobile podcast programs and video tutorials for use with mobile technology applications to provide procedural and policy information in onboarding and orienting new students. Supervised academic advising staff with a developmental and appreciative advising model.
- **Data Analysis and Policy Development** - Created data tracking systems to mine and analyze data, informing policy and procedural development as well as intervention initiatives to increase the college's success in serving its constituents. Prepared reporting regarding key systems and progression.

DREXEL UNIVERSITY

Philadelphia, PA

Program Manager, Undergraduate Studies, Teaching, Learning and Curriculum

2002 – 2008

Developed program structure and expanded curriculum offerings in online learning for three new programs, establishing Drexel as a leader in the online learning field.

- **Program Leadership and Development** - Co-developed portfolio of innovative, online degree programs, bringing the college into new markets both domestically and internationally. Led the online baccalaureate program to tremendous growth with 200% enrollment increases each year and \$5 million in revenue growth. Heightened brand awareness and thought leadership with solid campaigns through advertising, strategic partnerships, digital media, events, and viral marketing.
- **Government and External Affairs Leadership and Strategic Partnerships** - Led the School of Education's government and external affairs initiatives, facilitating partnerships for the School with government agencies, corporations, and non-profit organizations, building and managing relationships that resulted in the creation of internship opportunities for students, linking curriculum and real-world experience and broadened position scopes.
- **Student Development** - Advised a student population of 400 undergraduate and graduate students from admission through graduation using a developmental and appreciative advising model. Served on the Orientation, Retention, Commencement, Financial Aid, and Freshmen Experience Committees, developing partnerships and gathering information to create optimal student experiences.

THE ROCK SCHOOL

Philadelphia, PA

Director of Curriculum

2001 - 2002

- **Innovative Curriculum Development** - Directed the development and application of curriculum designed to incorporate dance as a creative, innovative, and inspirational tool for teaching, promoting interdisciplinary learning and expanding the school's instructional spectrum.
- **Strategic Planning** - Developed and executed a strategic plan for this William Penn Foundation grant-funded program, delivering an interdisciplinary curriculum to twenty partnering public and private schools, and managed a staff of five.
- **Integrated Marketing Campaigns** - Developed integrated campaigns incorporating print, focus group, and grass-root efforts, leading to successful partnership development with targeted schools and value-added publicity.

BRUNSWICK SCHOOL

Greenwich, CT

Kindergarten Teacher

2000 - 2001

- **Curriculum Development and Teaching** - Assumed a teaching and curriculum development role at an independent boys' school stressing focused interaction with student to teacher ratios of less than 8 to 1.

OPEN SOCIETY FOUNDATION of the SOROS FOUNDATION NETWORK New York, NY

Administrator

1998 - 1999

- **Research and Grant Writing** - Researched various aspects of program and grant development in international policy in the Office of General Counsel.
- **Contract Development** - Researched and reviewed international education contracts, serving as the office's primary data researcher.
- **Relationship Management** - Consulted with foreign emissaries regarding education program development, including the development of the Central European University in Budapest, Hungary.

INTERNATIONAL AMERICAN SCHOOL

Warsaw, Poland

English Teacher

1997 – 1998

- **Curriculum Development and Teaching** - Designed curricula and taught second, third, fourth, and sixth grade classes to a diverse and multinational student population. Served as publisher and Editor-in-Chief of the IAS Times.
- **Government and External Affairs Leadership** - Developed and organized a first-ever event in which over 10 United Nations delegates visited, toured, and lectured at the School, resulting in partnerships with these foreign emissaries.

MARTINIHAUS SCHOOL

Rottenburg am Neckar, Germany

English Teacher

1996 – 1997

- **Curriculum Development, Teaching, and Evaluation** - Developed curricula and assessment activities to teach English as a second language to 45 German middle- and high-school students. Created assessment activities to expand student engagement and advance learning, focusing on the further development of pronunciation, grammar, and vocabulary-building.
